Huawei Lithium Energy Storage Project Company

Overview

China-headquartered electronics firm Huawei has secured a supply agreement to provide a 4.5GWh battery energy storage system (BESS) for the Meralco Terra Solar project in the Philippines.

China-headquartered electronics firm Huawei has secured a supply agreement to provide a 4.5GWh battery energy storage system (BESS) for the Meralco Terra Solar project in the Philippines.

An energy storage system with higher energy density is needed in the 5G era. Intelligent lithium batteries that combine cloud, IoT, power electronics, and sensing technologies will become a comprehensive energy storage system, releasing site potential. Simple: IoT networking, from manual to Cloud.

China-headquartered electronics firm Huawei has secured a supply agreement to provide a 4.5GWh battery energy storage system (BESS) for the Meralco Terra Solar project in the Philippines. The agreement was announced yesterday (9 December) in a statement released by project developer Terra Solar.

The overarching goal is to facilitate a transition to low-carbon energy systems, aligning with global sustainability targets. One notable project is the collaboration with power utility companies to implement large-scale energy storage systems to support intermittent renewable energy sources.

The project, considered the world's largest solar-storage project, will install 3.5GW of solar photovoltaic capacity and a 4.5GWh battery storage system. The project has commenced in November 2024. Huawei has recently signed the contract with SEPCOIII at Global Digital Power Summit 2021 in Dubai.

In early December, Huawei signed a supply agreement for the 4.5GWh battery storage system of the MTerra Solar project with Terra Solar Philippines Inc. (TSPI). In early December, Huawei signed a supply agreement for the 4.5GWh battery storage system of the MTerra Solar project with Terra Solar.

- GoldenPeaks Capital and Huawei sign a strategic MoU to deploy 500MWh of

grid-forming battery energy storage systems (BESS) across Central and Eastern Europe. • Partnership strengthens grid stability amid rising renewable integration, aligning with EU carbon neutrality and energy resilience goals.
