

## ContainerPower Energy Solutions

# Industrial energy storage lithium battery foreign trade

### All In One

Integrating battery packs

### Intelligent Integration

integrated photovoltaic storage cabinet

### High-capacity

50-500kWh

### Rated AC Power

50-100kW

### Degree of Protection

IP54

### Altitude

3000m(>3000m derating)

### Operating Temperature Range

-20~60°C(Derating above 50 °C)

## Overview

---

Will China impose tariffs on lithium-ion EV batteries?

An interesting issue will be the imposition of tariffs. There are existing tariffs pursuant to Section 301 of the Trade Act of 1974 on some Chinese-origin lithium-ion EV batteries and non-lithium-ion battery parts, which were increased to 25% in September 2024.

Which international trade issues will remain a concern for energy storage projects?

Two major areas of international trade that will remain causes of concern for energy storage projects are the application of tariffs and supply chain integrity.

Is China still a supplier of lithium battery cells?

China remains a primary supplier of lithium battery cells for the U.S. market. In December 2024, lithium battery imports from China exceeded \$1.9 billion, according to U.S. trade records. However, changes under the 2025 tariff framework have added new barriers to this trade.

How much lithium batteries did the US import from China in 2024?

Recent trade data shows that the U.S. imported approximately \$1.9 billion lithium batteries from China in 2024. With the implementation of Trump's China tariffs in 2025, these imports now face a much higher cost structure.

How are battery tariffs reshaping global trade?

As new battery tariffs and expanded China tariffs continue to reshape global trade, U.S. policymakers and businesses are reevaluating the domestic battery supply chain. This section outlines the current status of U.S. battery production, the resources required to scale it, and the challenges involved in reducing reliance on overseas suppliers.

What is China's role in the lithium-ion battery supply chain?

China remains a dominant player in the global lithium-ion battery supply chain. According to international trade data, it leads to the production of battery-grade lithium compounds, cell assembly, and component manufacturing.
