# Inverter can be sold

## Overview

---

You can sell them directly to specialized companies that resell or recycle used solar equipment. Several manufacturers and retailers offer trade-in programs where you can return your old inverter for a discount on a new purchase.

You can sell them directly to specialized companies that resell or recycle used solar equipment. Several manufacturers and retailers offer trade-in programs where you can return your old inverter for a discount on a new purchase.

When you're ready to sell, crafting an effective strategy is crucial. Start by setting a realistic price, considering both the inverter's age and condition. If you're diving into the market, platforms like eBay and Craigslist or even niche forums dedicated to renewable energy can be your go-to.

Solar Asset Recovery is the secondary market, where you can sell excess new and used solar inverters. If we cannot recover any value on your solar inverters, we can offer a solar inverter recycling service. Interested in buying used or refurbished solar inverters?

We ship globally. Sell Your Used.

They seem to have sold on eBay in the \$20 to \$60 range. Search for them on eBay and filter by Sold/Completed to see what they actually sold for. And on eBay, you can charge for shipping. USPS flat rate boxes are dead simple to ship too. don't let shipping hold you back I built my 36 panel array.

Net metering is a billing system that allows homeowners or businesses with their own electricity generation—typically solar panels—to send excess electricity back to the grid (or electric companies) and receive credit for it. Here's how it works: During the day, your solar panels make more.

Wholesale solar companies have two main options for selling excess, surplus, clearance, and used PV equipment in the secondary market. They can utilize auction sites, and they can join EnergyBin, the wholesale solar B2B exchange for the world's PV professionals. Both options have their advantages.

To sell power back to the grid, you must have a connection to the grid. It means you must have a power source connected to the grid, such as a solar panel system. Once you have a connection to the grid, you can sell the power you generate back to the grid. The amount of money you can make from.
