## Overview

---

What is energy storage Ireland?

Energy Storage Ireland is a representative association of public and private sector organisations who are interested and active in the development of energy storage in Ireland and Northern Ireland. Delivering the energy storage technologies to enable a secure, carbon free electricity system on the island of Ireland by 2035.

Are home battery storage systems a good idea in Ireland?

In Ireland, demand for home battery storage systems — even without solar panels — is growing rapidly as homeowners look to reduce costs and gain energy independence.

How good is Ireland's energy storage strategy?

Smith pointed out that Ireland's energy storage strategy, published in 2024, was "quite positive." A lot of high-level plans and a technology agnostic outlook. "Unfortunately, we haven't seen a lot of progress on those actions which is a problem we are trying to address," said Smith.

How much battery storage does Ireland have?

There is just under a gigawatt of battery storage on the grid operating today. In addition to the almost 1 GW of BESS, Ireland also has 292 MW of pumped hydro at the Turlough Hill site in County Wicklow, which has been operating since the 1970s.

Does Highfield energy have a solar project in Ireland?

Highfield Energy has been one of the most active in Ireland, when incorporating energy storage alongside solar farms, with at least 15 applications submitted with this pairing. The company also has a few standalone projects with Aura Power; however, these predominantly date back to 2018.

Will DS3 tariffs affect energy storage in Ireland?

While the energy storage pipeline in Ireland remains strong, it is unlikely to see a similar growth in built capacities until a few years from now. The potential cut-backs in DS3 tariffs may also pose risk in the development of this market.
