Where can you safely charge your lithium-ion (bike) batteries?

And why is a safety cabinet - also known as a flammable storage cabinet - not the safest option?

In this blog, we explain how to charge your batteries in a reliable and safe way, and why choosing a certified battery safe is the right.

These have been functioning as expected since installation (August 2022), but we are experiencing low charging power overnight at the moment - 2kw vs the 3.5kw we normally have. We are on a time of use tariff and want to fully charge the batteries during off peak rates (6 hours), however this isn't.
