

## ContainerPower Energy Solutions

# Israeli enterprise solar power generation and energy storage equipment

## Overview

---

What percentage of Israel's Energy comes from renewable sources?

Currently, approximately 10 percent of Israel's energy comes from renewable sources. The Israeli government is committed to producing 30 percent of its electricity from renewable energy by 2030. Solar energy is expected to account for 26 percent of this goal.

When did Sungrow enter the Israeli market?

Sungrow entered the Israeli market in mid-2020 and signed its first ESS deal with Doral in March 2022 with a 253 MWh energy storage project. Doral Energy is one of the largest renewable energy developers in Israel, and its total pipeline in both Solar Storage I & II government tenders reaches over 1.4 GWh.

Is solar-plus-storage a sustainable solution?

This policy, combined with the decrease in PV and ESS costs, has led the Israeli government to implement renewable energy projects faster than ever before, and positions solar-plus-storage solutions as the sustainable solution that will ensure the reliability of the power grid in the near future.

What are Huijue group's energy storage solutions?

Huijue Group's energy storage solutions (30 kWh to 30 MWh) cover cost management, backup power, and microgrids. To cope with the problem of no or difficult grid access for base stations, and in line with the policy trend of energy saving and emission reduction, Huijue Group has launched an innovative base station energy solution.
