

ContainerPower Energy Solutions

Italian new energy battery cabinet base station power generation

Overview

Which projects have a battery energy storage system been implemented?

Internationally, we have already implemented major projects such as the Tynemouth stand-alone storage system in the UK and the La Cabaña photovoltaic plant in Chile, which is equipped with a Battery Energy Storage System that ensures its efficiency and stability.

What is Enel doing in Italy?

Enel is leading this revolution with advanced projects both nationally and internationally, thereby contributing to Grid stabilization and decarbonization. Since the 1980s, Italy has shown a constant propensity to innovate in the field of "classic" renewables, with the use of hydropower and pumped storage systems.

Is Italy a 'classic' renewables country?

Since the 1980s, Italy has shown a constant propensity to innovate in the field of "classic" renewables, with the use of hydropower and pumped storage systems. This pioneering spirit evolved with the advent of new renewables, such as solar and wind, which are not, however, programmable.
