

ContainerPower Energy Solutions

Italian smart energy storage battery

Overview

Italy has taken a major step forward in its energy transition efforts, giving the green light to 361 MW of new battery energy storage systems (BESS) spread across three regions—Lazio, Puglia, and Sardinia. Does Italy have a new battery energy storage system?

Italy has taken a major step forward in its energy transition efforts, giving the green light to 361 MW of new battery energy storage systems (BESS) spread across three regions—Lazio, Puglia, and Sardinia.

What will Italy get from a battery storage tender?

Winning participants of the tender will receive fixed revenues over a 15-year contract for capacity made available to the grid. Italy broke new ground in energy storage with its very first battery storage auction, competitively awarding the full 10 gigawatt hours (GWh) of capacity put up for tender.

What is Italy's first battery storage auction?

Italy broke new ground in energy storage with its very first battery storage auction, competitively awarding the full 10 gigawatt hours (GWh) of capacity put up for tender. One standout among the awards is GreenVolt, which bagged a 499 MWh battery project in southern Italy's Calabria.

What is the future of energy storage in Italy?

MP: The future of energy storage in Italy is bright. With investments in technology, regulatory support, and declining costs, BESS will become a key pillar of Italy's transition to a sustainable energy future. Telis Energy is proud to play a role in this journey by originating, developing, and building high-quality BESS projects.

Is there a real energy transition in Italy?

There can be no real energy transition in Italy without electricity storage systems. And here Enel Green Power is also playing a leading role, particularly

in battery energy storage systems (BESS), which are increasingly efficient and competitive, thanks to technological innovation.

Who won Italy's first battery storage project auction?

Italy's first battery storage project auction competitively awarded a 10 GWh tender to Enel (major utility in Italy), GreenVolt, among others. Plenitude which is Eni's renewable arm also won two projects totaling to 500 MWh.
