Overview

How do you promote green growth in Jordan?

Ensure mainstreaming of green growth into the next national development plan (post-2025) and other cross-cutting national plans (Jordan Response Plan, Jordan Economic Growth Plan, etc.). Coordinate with donors to link national priorities (projects and programs) with development assistance (grants, loans, public-private partnerships, etc.).

What is the purpose of EE upgrades in public buildings in Jordan?

The purpose of this action is to implement a number of EE upgrades in public buildings in Jordan based on the current priorities of MPWH, which is the ministry responsible for the management of public buildings across the country.

What is the pipeline of Jordan priority projects?

Pipeline of Jordan priority projects prepared (as concept notes) for application to the GCF. The identification and formulation of project concepts should be fully participatory and engaging of all related stakeholders. Sustainable Economic Growth: Reduce the country's reliance on fossil fuel imports.

Who are the stakeholders for green growth implementation in Jordan?

Donors, development agencies, and local NGOs are needed to provide financial support, technical expertise, and knowledge of local needs and context. Table 6 shows the roles and responsibilities of various stakeholders for green growth implementation in Jordan. Ensuring the action is successfully implemented within the planned time frame.

Does Jordan need a strong enforcement and inspection regime?

A strong enforcement and inspection regime are required for effective implementation. The purpose of this action is to establish a short-to-medium term strategy to address Jordan's energy storage needs, which is a critical

enabling component of the country's RE transition.
