Kazakhstan's solar module export tariffs

Overview

What is the tariff rate for imports from Kazakhstan?

The current tariff rate for imports from Kazakhstan is 10%. However, this rate can vary depending on the specific product category and any applicable trade agreements or exceptions. How do Kazakhstan tariffs affect import costs?

Kazakhstan tariffs directly increase the cost of importing goods by 10% of the product value.

How much solar energy does Kazakhstan use a year?

Solar energy can be widely used in two-thirds of the territory of the Republic of Kazakhstan. In the southern regions, the duration of solar radiation is from 2,800 to 3,000 hours per year, and the annual consumption of solar energy is from 1,280 to 1,870 kWh per 1 m².

Will trump impose higher tariffs on Kazakhstan?

U.S. President Donald Trump signed the order on July 31, introducing higher tariffs on imports from several countries, including Kazakhstan. According to the Kazakh Ministry of Trade and Integration, the new duties will cover 4.8% of Kazakhstan's exports to the U.S., leaving 95.2% of goods unaffected. Kazakhstan-U.S. trade overview.

Why is Kazakhstan threatening a 10% tariff?

Kazakhstan is threatened with an ADDITIONAL 10% tariff for aligning with BRICS policies under President Trump's trade warnings. On Monday July 7 2025, official letters were sent to 14 nations outlining tariffs that would go into effect on Aug 1, 2025. In the official letter, it was outlined:.

What is the energy potential of Kazakhstan?

The wind potential of Kazakhstan is 1.8trn kWh per year, close to 10 times Kazakhstan's current energy consumption, according to UN estimates. Solar

also has great potential given the number of sunny hours per year - typically between 2,200 and 3,000 - implying a capacity of 1,300-1,800kW/sqm per year. Hydro Power.

Is Kazakhstan a good place to invest in solar power?

Kazakhstan has remarkable solar potential with a very well-designed auction system, a clear renewable capacity addition schedule, and a solid decarbonisation target. The country is now also including storage systems as part of its public procurement strategy in a move that will ease further integration of renewables into the grid.
