

ContainerPower Energy Solutions

Kosovo solar panel grid-connected power generation companies

Overview

Does Kosovo have solar power?

Kosovo has the potential of capturing solar energy directly and converting it to electricity. The region of highest solar potential based on global horizontal irradiation is the southwestern part of Kosovo, centred around the city of Gjakova. Solar power is already used on the roofs of some buildings.

What are the power plants in Kosovo?

The greatest part of generation capacities of Kosovo are the two power plants: Kosova A and Kosova B. The capacities of the two power plants are lower than the installation parameters level, because of the outdated system and lack of maintenance during the last decade of the 20th century.

Are power plants polluting the environment in Kosovo?

Since most of electric power is produced by power plants in Kosovo they are considered the main environment pollutant. Actual emission of gases, dust and waste-water discharged from the existing power plants, are above the levels allowed by the EU directives.

How much does solar power cost in Prishtina?

Almost a year since the initial public call, the Ministry of Economy in Prishtina completed its pilot solar power auction. Even though it raised the ceiling price in late December to EUR 75 per MWh from EUR 65 per MWh amid repeated delays, it was closed at EUR 48.88 per MWh.
