Laos wind solar and energy storage project construction

Overview

What is the first wind project in Laos?

The 600 MW Monsoon wind project, the first wind energy project in Laos and the largest wind farm in ASEAN has completed construction.

Why is Laos building a wind farm?

Termed as Laos' "untapped wind resources", the largest wind farm in ASEAN will well utilize the renewable energy source, and undeniably boost the country's economy. The decision to construct the wind farm also seems to be of the idea behind the maximization of natural resources utilization. Laos also generates hydropower.

Are there wind projects in Lao PDR?

Despite the target of 73 MW via the Renewable Energy Development Strategy, there are currently no operational wind projects in the Lao PDR.

What did President Thongloun say about Laos' wind power project?

President Thongloun expressed his support for the expansion projects, commending the initiative as Laos' first wind power project and the largest in Southeast Asia. He praised its excellence in environmental stewardship and community development, highlighting its role in improving local livelihoods in the project area.

Who owns a 600 MW wind farm in Laos?

The 600 MW wind farm with 133 turbines was under ACEN with a 24% stake. Other partners include Mitsubishi Corp and SMP Construction among others. Type: Onshore Location: Sekong and Attapeu provinces, Laos Developer: Monsoon Wind Power Company Contractors: ACEN, PowerChina.

What is the monsoon wind power project?

The 600MW Monsoon Wind Power Project is a landmark initiative, featuring a 500kV transmission line that links Laos to Vietnam. It is slated for completion by 2025. As the first wind farm in Laos and the largest in Southeast Asia, Monsoon has set a new benchmark by securing a bankable cross-border Power Purchase Agreement.
