

## ContainerPower Energy Solutions

# Latvia Microinverter Professional Service

## Overview

---

Does APsystems offer a microinverter warranty?

APsystems offers a microinverter warranty of 25 years. The APsystems microinverter solution combines highly efficient solar harvesting and power conversion with our high-tech data collection and communication program – giving you real-time performance and efficiency about your solar array.

What is APsystems microinverter?

The APsystems microinverter solution marks a breakthrough in solar technology, making PV arrays more powerful, smart, reliable, cost effective and safe. Is a premier choice for optimizing your solar energy harvest, simplifying system design and maintenance, and improving safety for both installers and owners.

How long do APsystems microinverters last?

APsystems microinverters are designed for the same lifespan as the solar module. As the industry leader in solar microinverter technology, APsystems will always be here to stand behind our products. APsystems offers a microinverter warranty of 25 years.

Why do you need a microinverter?

Is a premier choice for optimizing your solar energy harvest, simplifying system design and maintenance, and improving safety for both installers and owners. Our microinverter technology individually monitors and maximizes power generation for each module in the array, boosting system efficiency by up to 20 percent.

Does APsystems microinverter support rapid shutdown?

The Rapid Shutdown functionality required under the new NEC 2014 is built into every APsystems microinverter. The APsystems microinverter is the affordable, flexible solution for your solar power array.

How many PV panels can a microinverter power?

One microinverter powers four PV panels with individual MPPT, reducing the cost of installation and Bill of Materials considerably. Revolutionary power electronics that eliminate failure-prone electrolytic capacitors, matching the true lifetime of PV panels.
