# Lesotho latest energy storage project scale

## Overview

---

Lesotho aims to increase generation capacity through a hydropower scheme where pre-feasibility study on the 1,200 MW pumped-storage project has shown promising results. The Monont'sa Pumped Storage Scheme, if executed, will meet medium and long term energy requirements of the region.

Lesotho aims to increase generation capacity through a hydropower scheme where pre-feasibility study on the 1,200 MW pumped-storage project has shown promising results. The Monont'sa Pumped Storage Scheme, if executed, will meet medium and long term energy requirements of the region.

The government's new energy policy, updated last month, phases out mandatory storage quotas for solar projects while introducing market-based incentives [1] [4]. Wait, no. Let me rephrase that. Lesotho isn't completely abandoning storage mandates. They're shifting from quantity-based requirements.

ng universal energy access remains a key priority. As of July 2025, Lesotho has electrified 303,074 households through grid extension and an additional 840 households through mini-grids, contributing o the country's overall electrification efforts. However, with 569,631 total households, a.

Lesotho has declared its bold ambition to become Africa's clean energy hub by 2030, with Prime Minister Ntsokoane Matekane leading the charge. Speaking at a high-level side event titled "EMPOWERING LESOTHO: Unlocking Finance to Drive the Energy Transition in a Land-Locked Developing Country," Prime.

It is the first utility-scale solar project in Lesotho, divided into two phases: the first phase will deliver 30 MW and the second 40 MW, with commissioning scheduled for early 2025. The consortium is led by Scatec (Norway) in collaboration with the Lesotho Electricity Company (LEC), the national.
