Libya Randian Energy Storage Project

Overview

How can Libya reduce its reliance on oil and gas resources?

Policies which capture the outlook of the oil and gas industry should be introduced into the country, to reduce its reliance on oil and gas resources. The NOC, being the champion of Libya's oil and gas industry, will be the main tool the government will use in ensuring the energy transition and net-zero goals are achieved.

Does Libya need a strategic energy policy?

In summary, Libya needs to form strategic energy policies that factor in the country's energy security alongside climate change and energy transition. Affordability and availability of energy supplies remain key to the country.

Is Libya achieving sustainable economic sustainability goals?

The Libyan government is actively working towards achieving sustainable economic sustainability goals. The adoption of renewable energy will not only help reduce carbon dioxide (Salih, 2014). A rapid and radical shift towards a sustainable global energy system is currently taking place.

Why does Libya need an energy transition?

The global oil and gas industry creates jobs for millions. The Libyan energy sector employs a lot of Libyans therefore, the need for this energy transition to account for the jobs that would be lost when the industry is in decline.

Could the Libyan NOC play a central role in Energy Transition Initiatives?

The Libyan NOC could play a central role in energy transition initiatives. The key factor for a sustainable energy economy in Libya is political stability. Energy transition, net-zero goals, and climate change are important discussions that should be had alongside energy security by any oil and gas-rich country.

Why does Libya need a solar power system?

Since most of Libya's hydropower is off -river, there is a need for substantial storage to support the solar -based energy system. Off- river Pumped Hydro im pacts compared to on-river hydropower storage. In a mature and competitive market, solar PV has clear economic advantages over fossil fuels and hydropower.
