Lithuania Energy Storage Industrial Park

Overview

Will Lithuania receive energy storage units in September?

The remaining battery parks will receive the energy storage units in September', said R. Štilinis. The energy storage facility system of 312 battery cubes - 78 each in battery parks in Vilnius, Šiauliai and Alytus and Utena regions - will provide Lithuania with an instantaneous energy reserve.

What is Lithuania's first commercial battery storage facility?

Located near Vilnius, this project will be the country's first commercial battery storage facility and is expected to increase Lithuania's total storage capacity by approximately 50%. The system is scheduled to begin operations by the end of 2025.

Is Lithuania planning a new industrial park on the Kronis pumped storage plant?

Lithuania's state-owned electricity production group Lietuvos Energija (Lithuanian Energy) is planning to set up a 30-hectare industrial park on the grounds of the Kruonis Pumped Storage Plant, a project that will require an estimated investment of 9.5 million litas (EUR 2.75 m), of which 9 million litas is expected to come from EU funds.

What is Lithuania's energy strategy?

The Strategy has 4 main objectives - to ensure a secure and reliable supply of energy to all consumers, to achieve 100% climate-neutral energy for Lithuania and the region, to transition to an electricity economy and develop a high value-added energy industry, as well as to ensure the accessibility of energy resources for consumers.

How much electricity does Lithuania generate?

According to Litgrid's (Lithuania's electricity transmission system operator) preliminary data, in the first half of the year 2024, the national electricity

generation amounted to 3,783.4 GWh, of which RES accounted for 2,990.1 GWh.
