## Overview

---

Renewable energy in Lithuania constitutes a growing source of energy in the country. In 2023, renewable energy sources accounted for 76.4% of in the country, up from 18.2% in 2010 and 1.4% in 1990.

As Lithuania strengthens its commitment to renewable energy and energy independence, an increasing number of government-backed subsidies and loan programs are available in 2025 for households and businesses investing in solar panels, wind energy, and energy storage systems.
