Logistics stations in San Marino that can ship batteries

Overview

The training course will guide attendees through general lithium battery requirements as well, as providing step-by-step procedures on how to classify, package and ship lithium batteries alone, in-equipment, or with equipment.

The training course will guide attendees through general lithium battery requirements as well, as providing step-by-step procedures on how to classify, package and ship lithium batteries alone, in-equipment, or with equipment.

Batteries are classified as dangerous goods due to their properties and the potential risk they pose if improperly used, damaged, overcharged, or other structural defects which can cause the battery to release energy. This can lead to short circuits, fires, explosions, and the production of toxic.

Unique risks associated with shipping batteries: Batteries provide the power source for personal computers, phones, automobiles, and life-saving appliances. However, batteries are classified as dangerous goods, because by definition they produce electricity from a chemical reaction. When improperly.

Our forwarding company offers professional solutions for your truck transport to and from San Marino. With many years of experience in the industry, we guarantee the smooth transport of your goods. Our focus is on efficient shipping processing, regardless of whether it is direct trips.

Before preparing your shipment, you need to classify your batteries: Batteries with Watt-hour (Wh) rating under 100Wh. Generally considered safe for transport but still require documentation. Batteries above 100Wh. Classified under UN3480 or UN3481, depending on packaging. Require stricter.
