

ContainerPower Energy Solutions

Make a simple outdoor power supply

Overview

Forget buying an over priced power station like a Jackery, Goal Zero, or other pre-built solar battery bank for your outdoor adventures. Instead, follow this guide and I'll make sure to answer all your questions about putting together your very own DIY power station.

Forget buying an over priced power station like a Jackery, Goal Zero, or other pre-built solar battery bank for your outdoor adventures. Instead, follow this guide and I'll make sure to answer all your questions about putting together your very own DIY power station.

In this instructable, I'm going to show you my journey of how I have built a portable power station that is very handy when you are in need of an electrical outlet when you are outside, for example camping. To, for example, charge your phone or just simply have some light during the dark.

You don't have to learn wiring, crimping, soldering, or stripping to make your own portable power station! I found the most basic way to save money and make a budget, affordable power.

A portable power supply keeps you powered wherever you go, whether camping, traveling by RV, or going off-grid. Learn about the different options.

With careful planning and execution, we finalized our power station by adding necessary components and ensuring proper wiring. We also detailed modifications to the toolbox for a clean and functional setup.
