Lilongwe, Malawi | 25th November 2024 — The Global Energy Alliance for People and Planet (GEAPP) and the Government of Malawi have officially launched the construction of a 20 MW battery energy storage system (BESS) at the Kanengo substation in Malawi's capital city, Lilongwe. This is GEAPP's first.

President Dr. Lazarus Chakwera launched the 20MW Battery Energy Storage System (BESS) Project at Kanengo Sub-station for the Electricity Supply Corporation of Malawi (ESCOM) Limited on Monday, November, 25, 2024. In his speech during the launch, Chakwera said BESS was among the projects his.

Rescuers operations following a landslide due to heavy rains from Cyclone Freddy in Blantyre, southern Malawi, on March 16, 2023. (Bloomberg) -- Malawi is building its first battery-energy system, a technology that will help protect its grid from cyclones that have battered the southern African.

Malawi constructing first battery-energy storage system to enhance grid resilience against cyclone-related outages. 20-megawatt project backed by Global Energy Alliance for People and Planet and Malawian government, aiming to provide backup power during grid disruptions. Project addresses energy.

The Global Energy Alliance for People and Planet (GEAPP), in partnership with Malawi's government and ESCOM, has launched a \$20 million project to build

the country's first Battery Energy Storage System (BESS) in Lilongwe. The initiative aims to cut carbon emissions by 10,000 tons annually while.

Malawi is building its first battery-energy storage system to protect its grid from extreme weather, including cyclones that have repeatedly disrupted power in recent years. With over 60% of its 586MW installed capacity reliant on hydropower, Malawi's grid is highly vulnerable to cyclones like Idai.
