As of 2025, Peninsular Malaysia's installed solar photovoltaic (PV) capacity has exceeded 2.5 GW, making up more than 7% of the region's total installed capacity. While this signals strong progress toward a low-carbon future, it also introduces operational challenges to a grid originally designed.

Will Malaysia's large-scale solar 5 tender be successful?

Industry observers told The Star that as Malaysia pushes forward with its Large-Scale Solar 5 (LSS5) program, flexible grid operations supported by storage are becoming critical. Success in the tender is expected to hinge on the strength of financial structures and technology partners. Source: The Edge Malaysia, The Star.

What is Malaysia's first large-scale battery project?

In 2024, Malaysia launched its first large-scale storage initiative, known as MyBeST, to build four grid-connected battery systems of 100MW/400MWh each. The bidding round opened in May and closed in July, with winning projects expected to come online by 2027.

What is driving demand for battery storage systems in Malaysia?

The growth of solar and other intermittent renewables is driving demand for battery storage systems. (Photo: iStock) Malaysia is rapidly expanding solar and other intermittent renewable generation, creating strong momentum for energy storage.
