

ContainerPower Energy Solutions

Mexico local new outdoor power supply

Overview

The off grid power supply market in Mexico is changing with increasing adoption rates of solar energy, hybrid systems, energy storage solutions, government incentives, and rural electrification programs. What does Mexico's energy regulator say about self-consumption power plants?

Mexico's energy regulator has issued new provisions to streamline the permitting process for self-consumption power plants between 0.7 MW and 20 MW, aiming to improve legal certainty for project developers. From pv magazine Mexico.

Do I need a power supply in Mexico?

You shouldn't need anything else, as the power and frequency are the same in Mexico and the United States. In Mexico, the frequency is typically 60Hz, but it's always safe to check your devices or items and see what frequency they run on. It should never be a problem, but it's always best to play it safe.

What opportunities are there in Mexico's electrical power industry?

Mexico's electrical power industry mainly offers opportunities for U.S. products, services, and technologies for energy efficiency, distributed generation, energy storage, small-scale renewable energy projects, and distribution networks. The U.S. Commercial Service Mexico is ready to assist you in exploring these opportunities in Mexico.

What is the national power system in Mexico?

Mexico's National Power System (Sistema Eléctrico Nacional or SEN) is one of the largest in the Western Hemisphere. It is comprised of nine regions, plus a binational electricity system in Baja California. Most of the nine regions are interconnected, forming the National Interconnected System (Sistema Interconectado Nacional or SIN).

How much electricity does Mexico use in 2022?

According to Mexico's National Power System Development Program (Programa de Desarrollo del Sistema Eléctrico Nacional or PRODESEN), the electricity consumption of the National Electricity System was 333,662 GWh in 2022, which represented an annual increase of 3.4 percent.

Does Mexico need a generation permit for interconnected self-consumption?

From pv magazine Mexico Mexico's National Commission for Regulatory Improvement (CONAMER) has published a draft agreement outlining the requirements for obtaining a generation permit for interconnected self-consumption at power plants with capacities between 0.7 MW and 20 MW.
