Middle East New Energy Storage Equipment

5 Years
warranty

Overview

Is large-scale energy storage a viable option in the Middle East?

Until recently, large-scale energy storage was barely a consideration in the Middle East, where fossil fuels have long dominated power generation. With renewable energy projects expanding across the region, energy storage has started gaining traction.

Is energy storage gaining traction in the Middle East?

With renewable energy projects expanding across the region, energy storage has started gaining traction. Unlike Europe, North America, and Asia, where renewable energy and storage technologies are well-established, the Middle East remains in the early stages of development.

Should a MENA energy storage alliance be established?

A report by Arab Petroleum Investments Corporation recommends establishing a MENA Energy Storage Alliance, supported by public-private partnerships, and offering financial incentives like tax benefits and green financing to attract private sector investments.

Is the MENA region a good place to invest in battery energy?

The MENA region is starting to witness a drastic increase in large-scale battery energy storage systems (“BESS”) projects, accompanying a soaring penetration of renewable energy. This has happened at a pace, which seems to have surprised many market analysts. In the past, forecasts for the MENA region showed a few GWh for the coming years at best.

Will UAE deploy 300mw/300mwh of battery energy storage capacity?

The UAE should deploy 300MW/300MWh of battery energy storage system (BESS) capacity in the next three years, according to one of its main utilities EWEC. Sungrow has signed another battery storage supply deal with renewable energy and sustainable infrastructure developer Doral for projects

in Israel.

Is Dewa building a pumped hydro storage facility in the UAE?

In the UAE, DEWA is building a 250 MW pumped hydro storage project in Hatta, set to be the first in the GCC by 2024. France-based energy company EDF has announced plans to explore the development of a 5 GW pumped hydro storage facility in Ras Al Khaimah, UAE. The proposed facility is designed to store energy for up to 12 hours.
