Namibia Battery Energy Storage Power Station

Overview

NamPower, Namibia's state-owned power utility, has signed a contract with a Chinese joint venture to build the first utility-scale battery energy storage system (BESS) in the country and the Southern African region.

NamPower, Namibia's state-owned power utility, has signed a contract with a Chinese joint venture to build the first utility-scale battery energy storage system (BESS) in the country and the Southern African region.

By 2030 the Namibian government plans to increase the share of renewable energies (RE) in its electricity generation from around 30% to 70%. With a growing share of RE the need for measures to maintain and improve energy supply stability is also growing. A battery storage system such as the KfW.

Key contracts have been signed for the first-ever grid-scale battery storage project in Namibia, signifying the African country's dedication to modernising its energy infrastructure, according to a top local official. Engineering, procurement and construction (EPC) contracts were signed today (13.

NamPower, Namibia's state-owned power utility, has signed a contract with a Chinese joint venture to build the first utility-scale battery energy storage system (BESS) in the country and the Southern African region. The contract was awarded to Shandong Electrical, Engineering & Equipment Group Co.

WINDHOEK, Oct. 15 — Namibia has received the first shipment of equipment for its 51-megawatt (MW) Omburu Battery Energy Storage System (BESS) project, the country's first utility-scale battery installation as the country moves to strengthen the electricity grid and expand renewable energy use. The.

NamPower's Senior Manager of Generation Projects, Ben Mingeli, emphasised the importance of Battery Energy Storage Systems (BESS) in mitigating potential intermittency issues. Mingeli said this earlier in the week during the ceremony for an Engineering, Procurement, and Construction (EPC) contract.

Namibia's just made a game-changing move. In December 2023, the country

signed contracts for its first utility-scale battery energy storage system (BESS) – a 54MW/54MWh project at Omburu Substation [1] [2]. But why should the world care about this project in a nation of 2.5 million people?

Wait, no.
