Nepal s power grid invests in energy storage

PUSUNG-R (Fit for 19 inch cabinet)

Overview

Gham Power together with its partners Practical Action and Swanbarton have officially been awarded a project by United Nations Industrial Development Organization (UNIDO) to install one of the largest energy storage systems in Nepal, with a total battery capacity of 4MWh.

Gham Power together with its partners Practical Action and Swanbarton have officially been awarded a project by United Nations Industrial Development Organization (UNIDO) to install one of the largest energy storage systems in Nepal, with a total battery capacity of 4MWh.

The company announced that this initiative aims to help industries and businesses reduce diesel consumption and transition toward decarbonisation through smart grid development. Gham Power, in collaboration with Practical Action and Swanbarton, has been awarded a project by the United Nations.

Nepal has made remarkable progress in expanding electricity generation capacity from 50 MW to 3,500 MW in 60 years. The private sector has played a crucial role in this process, which is evident in its contribution of around 80 percent of the installed capacity. However, much of the 3,500 MW is.

Hydropower constitutes 95% of installed capacity but can't store monsoon surplus for winter use. This energy rollercoaster costs Nepal 2.3% annual GDP growth according to World Bank estimates. Enter the Nepal Energy Storage Base initiative - a \$1.2 billion national program approved last month to.

Gham Power together with its partners Practical Action and Swanbarton have officially been awarded a project by United Nations Industrial Development Organization (UNIDO) to install one of the largest energy storage systems in Nepal, with a total battery capacity of 4MWh. Stakeholders have pointed.
