

ContainerPower Energy Solutions

New Zealand communication base station power supply solar power generation equipment manufacturer

Overview

What is base power?

Base Power is the energy behind Rural Connectivity Group's (RCG) mobile communications tower at TECT Park in Western Bay of Plenty. Why Base Power?

How Does It Work?

At Base Power, we provide the power you need - when you need it. Our specialised, all-in-one energy system uses the sun to generate electricity.

What are base power TM units?

Alternative ways to stay connected. We have developed Base Power TM units to provide standalone power generation. The units use solar panels and battery storage, along with backup diesel generation to supply you with safe, reliable and durable power independent of our electricity network.

What is a base power unit?

These units are used as an alternative to maintaining traditional overhead lines where the distance and terrain makes it difficult. We'll be in touch if we think a Base Power solution is right for you, or you can contact us.
