

ContainerPower Energy Solutions

New Zealand power generation container

Overview

As part of their information disclosure regulations, Transpower and all 29 EDBs are required to report the duration, frequency, and causes of power outages. The duration and frequency of outages are normally expressed in (system average interruption duration index) and (system average interruption frequency index). In the five years to 31 March 2024, the 29 EDBs reported an average unplanned-outage SAIDI of 204.04 minutes and a SAIFI of 1.87, and an av.
