

## ContainerPower Energy Solutions

# New battery energy storage companies in the Philippines

## Overview

---

When exploring the battery storage industry in the Philippines, several key considerations are crucial. The country is experiencing a significant push towards renewable energy, driven by government initiatives and incentives aimed at increasing energy security and sustainability.

When exploring the battery storage industry in the Philippines, several key considerations are crucial. The country is experiencing a significant push towards renewable energy, driven by government initiatives and incentives aimed at increasing energy security and sustainability.

HyperStrong, a global leading provider of energy storage system solutions, has marked a significant strategic step in the Southeast Asian market with two key achievements in the Philippines in October 2025. The company inaugurated its new office in Manila's Bonifacio Global City (BGC) financial.

ACEN is revolutionizing energy solutions in the Philippines with cutting-edge battery storage projects. These initiatives are tailored to enhance grid reliability, allowing for smoother integration of renewable sources and providing critical backup during peak demands. By investing in these.

With construction poised to commence imminently, the initiative marks a pivotal step toward enhancing grid stability and maximizing the efficiency of the nation's renewable energy resources. The projects entail the integration of a 16 MW battery storage system at the existing Magat hydropower.
