The UK needs to build new, gas-fired power stations to ensure the country's energy security, Prime Minister Rishi Sunak said on Tuesday.

The UK needs to build new, gas-fired power stations to ensure the country's energy security, Prime Minister Rishi Sunak said on Tuesday.

The government has announced “common sense” plans to build polluting gas-fired power stations to secure the UK’s energy supply as the nation transitions to net zero. Ministers say they are supporting the building of new gas power stations to combat energy price rises and “maintain a safe and.

Four nuclear power stations will generate for longer in a boost to the UK’s energy security and clean power targets. A decision taken (3 December) by EDF will see the lifetimes of all four generating Advanced Gas Cooled Reactor stations extended. Heysham 2 (Lancashire) and Torness (East Lothian).

Nuclear pioneers X-energy and investor Centrica have outlined the next steps for deploying the UK’s first Advanced Modular Reactor power station in Hartlepool, a move described as “the biggest deal in Hartlepool’s history”. The companies announced a Joint Development Agreement to deploy the UK's.

Steam rises from the SSE Thermal gas fired power station near Grain, Isle of Grain, southeast England. Photographer: Daniel Leal/AFP/Getty Images (Bloomberg) -- The UK will allow new gas-fired power plants to be built into the 2030s, watering down a previous commitment to have a net zero grid by.

Project leaders for the UK’s first Advanced Modular Reactor (AMR) power station outlined the next steps in making the plans reality to local key stakeholders at Hartlepool College of Further Education on Thursday. It comes after American company X-energy and Centrica, a major UK energy business and.
