New energy storage policy subsidies 2025

Overview

What is New York state's energy storage plan?

New York State aims to reach 1,500 MW of energy storage by 2025 and 6,000 MW by 2030. Energy storage is essential for creating a cleaner, more efficient, and resilient electric grid. Additionally, these projects will provide meaningful benefits to Disadvantaged Communities and Low-to-Moderate Income New Yorkers.

Why did President Trump end subsidies for wind and solar energy?

In response to the bill, on July 7, 2025, President Trump signed an executive order ending market-distorting subsidies for wind and solar energy, labeling them unreliable and overly dependent on foreign-controlled supply chains.

Does New York have a bulk energy storage program?

The New York State Energy Research and Development Authority filed with the New York Public Service Commission a proposed bulk energy storage program implementation plan designed to support the state's build-out of storage deployments to meet the stated goal and to reduce projected costs by nearly \$2 billion.

How much do wind and solar subsidies cost taxpayers?

In the United States alone, Treasury data reveals that wind and solar subsidies dominate energy-related tax provisions. These subsidies cost taxpayers \$31.4 billion in 2024 and were projected to total another \$421 billion between 2025 and 2034, largely driven by the IRA.

How will energy storage affect New York's energy grid?

In June 2024, New York's Public Service Commission expanded the goal to 6,000 MW by 2030. Storage will increase the resilience and efficiency of New York's grid, which will be 100% carbon-free electricity by 2040. Additionally, energy storage can stabilize supply during peak electric usage and help keep

critical systems online during an outage.

What is New York's energy storage roadmap?

The Roadmap proposed a comprehensive set of recommendations to expand New York's energy storage programs to cost-effectively unlock the rapid growth of renewable energy across the State and bolster grid reliability and customer resilience.
