# New portable power cabinet recommendation

## Overview

---

Why should you buy a portable power station?

Bring big backup power with you with these expert-recommended portable power stations, which can store enough power to charge electronics, appliances, and more.

How do I know if a portable power station is good?

Check the output wattage and battery capacity to see what a portable power station is capable of. The Westinghouse iGen160s is a basic little power station capable of keeping your electronics charged during a brief power outage or camping trip. I like that it has a flashlight (perfect for getting set up in the dark when the power is out).

How do I choose a portable power station?

Here are the all the key factors you'll want to look at when deciding on a portable power station. Size: Portable power stations come in a wide array of sizes and capacities, from the small and compact EcoFlow River 3, to the more capacious Anker Solix F3800, which stretches the limits of the word "portable," despite coming with wheels.

Are portable power stations democratizing power on the go?

The proliferation of portable power stations is democratizing power on the go. These batteries are great for keeping your devices powered, but they come in different sizes, prices, capabilities, and port options. How do you know which are the best power stations for your specific needs?

I've been testing and researching all the hottest ones.

Are portable power stations better than gas-powered generators?

In an emergency, these power stations offer some major advantages over gas-powered portable generators, despite being less powerful. Portable power

stations are silent and don't produce additional emissions, so you can use them safely indoors and while you're sleeping.

How long does a portable power station last?

A portable power station's lifespan depends on the type of battery inside. Most new portable power stations, including all the models we recommend here, feature LiFePO4 battery technology, which lasts far longer than older lithium-ion technology. How much more?

LiFePo4 power stations will last for more than 3,000 charge cycles, or about 10 years.
