

## ContainerPower Energy Solutions

# Nordic flow battery wholesale

## Overview

---

What does Nordic batteries do?

We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid systems. At Nordic Batteries we focus on what is important: safety, reliability and performance.

Are Nordic batteries looking for a development engineer?

Nordic Batteries are seeking a development engineer for mechanical construction and system design. Factor 47 is operative! The pilot line where Nordic Batteries will produce their first battery modules is now officially open after the visit from former Prime Minister Erna Solberg where she cut the banner to kick it off.

What is the Nordic battery value chain?

The battery value chain builds upon Nordic traditional strongholds such as automotive, maritime, chemicals, manufacturing and mining. Actors within the Nordic battery ecosystem are active on global markets with strong ambitions and devotion to sustainability.

What is the Nordic battery collaboration?

The Nordic Battery Collaboration is a key initiative. The decision to carry out this report was taken by Business Sweden, Business Finland, Innovation Norway and the Swedish Energy Agency together. All parties are financing the report. The report is conducted by Business Sweden.

What are flow batteries used for?

Flow batteries help create a more stable grid and reduce grid congestion and fill renewable energy production shortfalls for asset owners. Global R&D is fueling the development of flow battery chemistry by significantly enabling higher energy density electrodes and also extending flow battery applications.

Are flow batteries the future of energy storage?

Flow batteries, with their ability to create a more stable grid and reduce grid congestion, are considered a promising technology for energy storage. Their adoption is closely linked with the surging energy storage market and can help fill renewable energy production shortfalls.
