Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled

Overview

In conclusion, there are several methods you can use to determine whether an outdoor energy power supply is fully charged, including checking the indicator lights, monitoring the charging time, using a voltmeter, checking the BMS, and performing a load test. How do I know if my electrical supply is safe?

Check that the equipment is suitable for the electrical supply with which it is going to be used, and the electrical supply is safe. It is often beneficial to use a Residual Current Device (RCD) between the electrical supply and the equipment. Make sure that the user of the equipment is trained to use it safely and can keep others safe.

How do I know if my electrical equipment is good?

Check that the electrical equipment is suitable for the work and way in which it is going to be used. Check that the electrical equipment is in good condition. The HSE booklet 'Maintaining portable and transportable electrical equipment' will help you do this.

When should a power supply be used?

Regular tests performed by a competent person, using suitable equipment are a good way of reducing risks. Where there is evidence that the supply may not be safe, such as damaged equipment or wiring, the supply should not be used until work has been done to correct this.

What is an external power supply?

Sign up for email updates on regulations for this and other products As defined in the Code of Federal Regulations (CFR), "external power supply" means an external power supply circuit that is used to convert household electric current into DC current or lower-voltage AC current to operate a consumer product.

What is the National Electrical Code (NEC) for outdoor wiring?

The National Electrical Code (NEC) includes many specific requirements for installation of outdoor circuits and equipment. With outdoor wiring, the primary safety concerns involve shielding against moisture and corrosion, preventing physical damage, and managing issues related to underground burial.
