Outdoor power supply capacity recommendation

Overview

Generally speaking, if it is a short-term camping trip and only charging a few small devices such as mobile phones and cameras, a 500 - 1000Wh capacity outdoor power supply can meet the requirements; for long-term outdoor operations, group travel, or scenarios that require driving.

Generally speaking, if it is a short-term camping trip and only charging a few small devices such as mobile phones and cameras, a 500 - 1000Wh capacity outdoor power supply can meet the requirements; for long-term outdoor operations, group travel, or scenarios that require driving.

Every outdoor power installation requires a specific amperage rating based on the devices it powers. Pedoc offers a range of amperage options to accommodate various applications. Ideal for: Device charging, landscape lighting, and small tools. Best for: Public parks, streetscapes, residential.

Portable power stations can deliver power when you need it most, whether during power outages or just for an off-grid adventure. These handy electricity suppliers vary in size, output, and energy source, not to mention durability. That's why we've tested 22 models since 2022; some we've kept on.

(Summary description) In 2025, choosing the right outdoor power supply is crucial for a range of activities, from camping trips to emergency power backup. Whether you need to charge your devices while off the grid or ensure a reliable power source during a power outage, selecting a power supply.

Outdoor power supply, actually called outdoor mobile power, is equivalent to a portable charging station. The main feature is the configuration of various types of output ports: 1. USB and TypeC can charge general digital devices. 2. Car charger interface, you can charge the car battery, or other.

One of the most important things to consider is the power capacity. It's usually measured in watt - hours (Wh). You need to figure out how much power your devices consume. For example, if you have a small LED light that uses 5 watts and you plan to use it for 10 hours a day, that's 50 watt - hours.

Small Devices: Devices such as smartphones, laptops, cameras, and lights typically require a small amount of power. Portable power stations or power banks with a lower wattage (around 100W to 500W) are sufficient.

Larger Devices: Power tools, refrigerators, and other high-wattage appliances require.
