# Papua New Guinea base stations have peak-valley energy storage

## Overview

---

Does Papua New Guinea have a reliable electricity supply?

(Facebook: PNG Power) From Yonki hydropower plant in the Eastern Highlands to Warangoi in the Niugini Islands, Papua New Guinea is a nation abundant in natural energy resources — yet it consistently grapples with an unreliable electricity supply.

Who is responsible for Papua New Guinea's electricity grid?

(Supplied) The entity primarily responsible for Papua New Guinea's electricity grid is PNG Power, a State-Owned Enterprise (SOE). Like other SOEs such as PNG Water and Air Niugini, PNG Power is intended to provide essential services, but its performance has consistently fallen short, leading to widespread public dissatisfaction.

Why is Papua New Guinea so unreliable?

From Yonki hydropower plant in the Eastern Highlands to Warangoi in the Niugini Islands, Papua New Guinea is a nation abundant in natural energy resources — yet consistently grapples with an unreliable electricity supply.

Is Papua New Guinea at a crossroads?

Papua New Guinea is a country at a crossroads. Rich in resources, yet plagued by a lack of consistent power, it faces a stark choice.

What are the consequences of Papua New Guinea's blackouts?

Mr Fore expressed the frustration and added burden on medical staff, who often work uncompensated extra hours due to delays caused by outages. The immediate and most visible consequence of Papua New Guinea's blackouts is the disruption to everyday life. (Supplied).

Is Papua New Guinea a good country?

Papua New Guinea is a country at a crossroads. Rich in resources, yet plagued by a lack of consistent power. (Supplied) However, Mr Rawali's hope is tempered by a deep-seated scepticism, born from decades of unfulfilled promises and reform papers that have yielded little tangible change.
