

ContainerPower Energy Solutions

Paraguay s busiest communication base station wind and solar hybrid

Overview

Can Paraguay use natural gas as a transitional energy source?

In addition to its focus on renewables, Paraguay is also looking to natural gas as a transitional energy source. The country's new energy policy includes a project to integrate natural gas into its energy matrix. This would provide a reliable alternative to hydrocarbons while renewable technologies continue to scale.

What is Paraguay's Energy Vision?

A critical component of Paraguay's energy vision is hydrogen fuel production. The country's rivers, especially the Paraná and Paraguay, are vital trade routes and key to the country's energy strategy. Approximately 80% of Paraguay's foreign trade passes through these rivers, providing a direct link to the Atlantic Ocean.

Does Paraguay need a diversified energy matrix?

Paraguay's ambitious energy policy is a bold step toward a more sustainable future, but it also comes with challenges. The transition to a diversified energy matrix will require significant investment in infrastructure, research, and development.

Is hydrogen the future in Paraguay?

"Hydrogen is the future," Bejarano stated, highlighting the country's ambitions to develop hydrogen-based energy solutions over the next few decades. This focus on innovation aligns with global trends and sets Paraguay on a path to becoming a key player in the renewable energy market.

What is Paraguay's energy policy?

The policy is expected to enhance Paraguay's energy resilience, foster innovation, and contribute to global sustainability goals. Paraguay has long been known for its reliance on renewable energy. Nearly 100% of its electricity

is generated from hydropower, mainly through the Itaipu and Yacyretá dams.

Why is Paraguay promoting biofuels?

By promoting biofuels, Paraguay aims to cut carbon emissions and reduce its reliance on imported fossil fuels. The shift toward biofuels is part of a broader “energy transition” that the government sees as crucial to modernizing the country’s energy infrastructure.
