Poland Tong Energy Storage

Overview

What is Poland's energy storage subsidy?

Learn about Poland's €1 billion energy storage subsidy aimed at installing 5.4 GWh of BESS by 2028, strengthening grid stability and accelerating the green transition.

Will Poland become a hotbed of energy storage project development?

Poland, Europe's tenth-largest economy, is set to become a hotbed of energy storage project development as the share of renewable energy on its grid soars. The country built out a record 1.2 GW of onshore wind power in 2023, according to industry body WindEurope, bringing its total installed capacity to around 9.4 GW.

What happened to energy storage in Poland?

The Energy Regulatory Office said in a report last year on electricity storage in Poland that, as a result of the main power market auctions for 2021-2028 and the supplementary auctions for 2012-2025, contracts for energy storage with a total capacity of 9.5 GW were concluded.

What is Poland's energy storage program?

The program, "Electricity storage facilities and infrastructure for improving the stability of the Polish power grid," is aimed at companies planning to invest in energy storage facilities with a capacity of at least 2 MW and a minimum capacity of 4 MWh.

How much money does Poland spend on battery energy storage?

Poland has finalized a comprehensive subsidy program aimed at accelerating the deployment of battery energy storage systems (BESS), with a total budget of PLN 4 billion (approximately €1 billion).

Is energy storage a good investment in Poland?

In Poland, interest in energy storage investment has been evident for some time. Last year's main auction of the power market, with capacity delivery for 2029, further bumped up the capacity of storage projects.
