Portable energy storage product shipments

Overview

That's mobile energy storage in action - and shipments of these portable powerhouses are growing faster than avocado toast orders at a hipster café. In 2025 alone, the global mobile energy storage market is projected to ship over 15 GW of capacity, enough to power 3 million homes [1].

That's mobile energy storage in action - and shipments of these portable powerhouses are growing faster than avocado toast orders at a hipster café. In 2025 alone, the global mobile energy storage market is projected to ship over 15 GW of capacity, enough to power 3 million homes [1].

The global portable energy storage system market was valued at USD 4.4 billion in 2024 and is expectations to reach USD 40.9 billion by 2034, growing at a CAGR of 24.2%. Growing trends in mobility, such as camping, hiking, and the use of recreational vehicles, are expected to impact the product.

PCS shipments to front-of-the-meter (FTM) energy storage siting accounted for over 50% of total global shipments over the forecast period (2023-30), with the United States and China mainland accounting for the majority of these shipments. While some PCS suppliers are globally focused, many.

On May 20, 2025, InfoLink Consulting released its Q1 2025 Global Energy Storage Supply Chain Database, reporting global energy storage cell shipments of 99.58 GWh, a 150.62% year-on-year increase, despite a 7.75% quarter-on-quarter decline. Policy-driven factors, including U.S. tariff impacts and.

The portable energy storage box market is experiencing robust growth, driven by increasing demand for backup power solutions during power outages and the rising popularity of outdoor activities. The market, estimated at \$5 billion in 2025, is projected to exhibit a Compound Annual Growth Rate.

for stationary storage and EVs (in 2025). Effective energy storage programs can help you and the customer make the most of batteries. Operating margins and barriers to entry for new companies Lithium-ion Battery Market Size & Trends. The global lithium-ion battery market size was estimated at USD.

According to our (Global Info Research) latest study, the global Portable Energy Storage market size was valued at US\$ 2286 million in 2024 and is forecast to a readjusted size of USD 6729 million by 2031 with a CAGR of 16.9% during review period. Portable Energy Storage Power Supply is a kind of. Who makes portable energy storage systems?

However, renewables generate intermittent power, making portable energy storage systems essential for energy management and grid stability. Top three players, including Chint Global Bluetti Power, and Jackery Technology GmbH account for nearly 43.5% of the portable energy storage system industry.

Which portable energy storage systems are available in Australia?

Eminent players operating in the portable energy storage system market are: In November 2024, in Australia, BLUETTI plans to introduce the AC70, AC2A, and AC200L portable power stations. With a 204Wh capacity, 300W AC output, and 600W surge, the AC2A is ideal for hikers and campers, weighing only 3.6kg.

How much is the portable energy storage system industry worth?

The portable energy storage system industry was valued at USD 2.8 billion, USD 3.5 billion and USD 4.4 billion in 2022, 2023 and 2024 respectively. The industry is segmented in lithium-ion, lead-acid and others based on technology.

Who are the major players in the portable energy storage system industry?

Some of the major players in the portable energy storage system industry include AceOn Group, Anker Innovations, ATGepower, Bluetti Power, Chint Global, EcoFlow, Goal Zero, Jackery Technology, Jntech Renewable Energy, Jiangsu Senji New Energy Technology, iForway, Schneider Electric, Zhejiang Xili New Energy.

What percentage of PCs shipments are to front-of-the-Meter (FTM) energy storage?

PCS shipments to front-of-the-meter (FTM) energy storage siting accounted for over 50% of total global shipments over the forecast period (2023–30), with the United States and China mainland accounting for the majority of these shipments.

What is the future of portable storage?

According to the IEA, renewables are expected to hold for almost half of global electricity generation by 2030, with wind and solar PV's share projected to double to 30%, driving up the demand for portable storage systems to harmonize supply and need. Growing outdoor recreation industry drives the demand for off-grid power solutions.
