

## ContainerPower Energy Solutions

# Pretoria energy storage project investment

## Overview

---

What is battery energy storage project?

The Battery Energy Storage Project (Project) provides a solution to address both challenges. The Project can store excess renewable energy in low demand periods and release the energy during peak hours, meeting the demand with energy from renewable resources and minimizing the use of fossil-fuel based generation.

How much energy storage capacity does South Africa have?

South Africa had 1,604.6kW of capacity in 2022 and this is expected to rise to 3,519.9kW by 2030. Listed below are the five largest energy storage projects by capacity in South Africa, according to GlobalData's power database. GlobalData uses proprietary data and analytics to provide a complete picture of the global energy storage segment.

What is Kenhardt solar PV Park – Battery energy storage systems?

The Kenhardt Solar PV Park – Battery Energy Storage Systems is a 225,000kW lithium-ion battery energy storage project located in Kenhardt, Northern Cape, South Africa. The rated storage capacity of the project is 1,140,000kWh. The electro-chemical battery storage project uses lithium-ion battery storage technology.

What is Ilanga – thermal energy storage system?

The Ilanga I – Thermal Energy Storage System is a 100,000kW molten salt thermal storage energy storage project located in ZF Mgcawu, Upington, Northern Cape, South Africa. The thermal energy storage battery storage project uses molten salt thermal storage storage technology. The project will be commissioned in 2020.

Where is a new phosphate mine located in South Africa?

Implementation of a new phosphate mine. The project is in South Africa, North

West Province. This project aims to secure investment in an open-cast gold mine in South Africa as part of a broader strategy to diversify business interests and strengthen economic ties between Saudi Arabia and South Africa.

What is the contribution of energy storage to vanadium demand?

The contribution of energy storage to vanadium demand is increasing rapidly

1. Overview and examples of recent VFB projects and installations outside of China (1/2) Invinity will supply an 8.4MWh VFB to a solar-plus-storage project in Alberta, Canada. It will be paired with a 21MW solar PV plant.
