Price of 5KW inverter for home solar power generation

Overview

Key PointsAn inverter is a critical component of every solar system. Solar inverters can cost between \$1,000 and \$1,500 for a medium-sized installation. Our list of the best inverters highlights cost, size options, warranty, and efficiency levels. How much does a 5kw solar inverter cost?

For example, decent-quality 5kW solar inverters, which can support up to 6.6kW of panels, start at \$1,000 for budget single-phase models (e.g., Sungrow, Goodwe, or Solis) and up to \$2,000 for premium single-phase models (e.g., Fronius or SMA). If you want a 3-phase, 5kW inverter; add around \$400 to those prices.

Is a 5 kW inverter worth it?

It could be that the system will spend such little time providing above 5 kW, once shading and losses are taken into account, that it's not worth the cost of getting the next-largest inverter.

How much does a 5kw Solar System cost in China?

Prices have dropped significantly, but quality varies widely across suppliers and system types. A complete 5kW solar system in China costs ¥15,000-¥30,000 (\$2,100-\$4,200), with Tier-1 panels from Longi or Jinko at ¥0.9-¥1.3 (\$0.13-\$0.18) per watt. Installation adds 10-20% to the total price.

How many kW can a solar inverter deliver?

If it does not, then 6.6 kW (peak) ideal rating of your solar panels won't deliver more than 5 kW ever. If you still have concerns, ask a rival solar panel installer. He'll be more thorough than some internet forum. As a bonus, you might get better inverter efficiency from running a slightly undersized inverter.

How much does a solar system cost in China?

Component Checklist: Solar systems in China offer exceptional value at

40-60% lower costs than Western markets. Quality systems start at ¥15,000 (\$2,100) with 6-8 year payback periods. This article will take you through solar system price in china: how much does it really cost, but the quality varies greatly by supplier and system type.

How much do solar panels cost?

Global solar panel pricing varies wildly. Manufacturing locations dramatically affect final costs. China produces the world's cheapest solar panels at \$0.13-\$0.18/watt. Vietnam and Malaysia follow at \$0.18-\$0.22/watt. US/EU panels cost \$0.30-\$0.50/watt. Key Insight: Cheapest doesn't mean lowest quality.
