

ContainerPower Energy Solutions

Private customized solar integrated machine for home use

Overview

What is a solar panel kit?

Our solar panel kits for home are easy for you or a contractor to install. Each solar panel kit comes with solar panels, grid-tie inverters and mounting hardware and is customized to your energy needs and home's unique specifications. Take our quick questionnaire to create a custom solar panel kit based on your energy needs.

What is a solar inverter & a microinverter?

An inverter converts DC (direct current) into AC (alternating current) to generate energy that powers your home. Microinverters are installed behind each solar panel to create separate power-generating units. This allows for easy future expansion.

Should you install DIY solar panels for your home?

When you install DIY solar panel kits for your home, you can save thousands of dollars and avoid the hassle of working with costly professional installers. You'll also have full control over your solar panel project. Get your solar system up and running ASAP so you can reduce or eliminate your monthly electric bill.

Are ground mount solar panels a good choice for your home?

Maintenance, troubleshooting or future panel replacement may be challenging for those with steep or slippery roofs. Ground mount solar panel kits for home are hefty and require unused land but are cost-effective and highly efficient for properties with south-facing roofs and optimal sun exposure.

Does gogreensolar offer a permit service?

Plus, GoGreenSolar is the only solar company that offers a permit service and complete technical support to help you install your ground mount solar panels correctly. *Listed pricing assumes a basic 3-row array — your designed price

may vary. Which inverter should I choose?

Flexible installation.

Which solar inverter is best?

Microinverters are also best for properties with shade, as individual solar panels are optimized for maximum efficiency. For ground mount kits, you also have the option of using a string inverter, where solar panels “string” together and connect to a central inverter.
