While their core business remains focused on oil and gas, QatarEnergy is strategically investing in solar power and exploring battery storage solutions to diversify its portfolio and contribute to a more sustainable future. This commitment is underscored by their ambitious goal to develop 2-4 GW of.

With National Vision 2030 as its blueprint, the country is building a future powered by clean, stable, and intelligent energy. At the core of this transformation is one critical technology: Battery Energy Storage Systems (BESS). No longer an emerging concept, BESS is live and solving real-world.

In an era where energy efficiency, sustainability, and grid independence are becoming increasingly crucial, 10kWh home lithium batteries have emerged as a game - changing solution for residential energy storage. These batteries are designed to store electrical energy, which can be used during peak.
