Qatar produces lithium battery packs

Overview

Doha, January 12 (QNA) - A research team from the Center for Advanced Materials (CAM) at Qatar University (QU) is developing high-quality and low-cost battery packs, using innovative materials used in the negative and positive electrodes of the next generation of batteries that operate on lithium and sodium ions. Is Qatar Airways a lithium battery certified airline?

DOHA, Qatar - Qatar Airways has become the second airline in the world to become IATA CEIV Lithium Battery certified and Qatar Aviation Services is the first ground handling company to be certified globally. The certification aims to improve safety in handling and transportation of lithium batteries throughout the supply chain.

Which airline has a lithium battery certification?

Doha: Qatar Airways has become the second airline in the world to become IATA CEIV Lithium Battery certified and Qatar Aviation Services is the first ground handling company to be certified globally. The certification aims to improve safety in handling and transportation of lithium batteries throughout the supply chain.

Can lithium batteries improve air transport safety?

As a global network carrier and integrated group of aviation businesses the issues relate to both Qatar Airways and Qatar Airways Cargo principally, therefore driving greater awareness of the handling of Lithium batteries will help improve safety in the air transport industry.

Why are lithium batteries so important?

Guillaume Halleux, Chief Officer Cargo at Qatar Airways Cargo added: "Lithium batteries play a huge part in our daily life, from the toys we buy for our children, to the laptops we use every day, and the cars we drive, to name but a few examples.

Are lithium batteries safe?

Lithium batteries are in very widespread use in a range of consumer products from smartphones to electric scooters, while the risks associated with their usage and carriage amongst consumers are not well known.
