

## ContainerPower Energy Solutions

# Remote heavy-duty solar panels

## Overview

---

### What is the Remote Power System?

The Remote Power System from Mr. Solar® is a kit designed to provide AC power to remote cabins or off-grid locations. It is specifically designed for three mid-size 72 cell panels (24V).

### What is a RD series solar generator?

RD Series portable skid-mounted solar systems with battery storage for remote backup power. Portable or fixed, off-grid or grid-connected, the MAPPS® RD Series provides reliable backup power in remote locations. The RD Series skid-mounted solar generator systems are quick to deploy and are designed for your specific load requirements.

### What is a ses RD series Solar System?

The RD series can also be used to provide backup power for residential or commercial grid connected critical load applications. SES MAPPS® RD Series systems represent the highest standards of reliability, component selection, workmanship and system performance. MAPPS® pole mount solar systems are also available.

### What is a ses Mapps® RD series solar generator?

SES MAPPS® RD Series are pre-assembled, pre-wired and tested skid-mounted portable solar generator systems that provide rapid deployment power for remote areas where conventional power is too costly or difficult to reach.

### What is a 4 kilowatt photovoltaic system?

A 4 kilowatt photovoltaic system is designed to produce 4 kilowatts of direct current (DC) power and convert it to up to 700 kilowatt hours (kWh) of alternating current (AC) electricity for use in off-grid residential or commercial/industrial applications.
