Sao Tome and Principe Huijue solar Module Project

Overview

Will Sao Tome & Principe get a 2 MW solar project?

The island nation of Sao Tome and Principe switched on the initial phase of its first 2 MW solar project in August. Construction of 1.4 MW of PV capacity is now underway at two airports, and developers plan to install a total of 1.7 MW by 2023.

What is the Sao Tome & Principe project?

Brief Description: The objective of the project is to introduce an integrated energy and ecosystems-based approach to grid/isolated-grid-based mini/small hydro-electricity generation in Sao Tome and Principe by leveraging \$ 20.7 million in multilateral and private sector financing over its five-year implementation period.

Are there any studies on solar power potential in Sao Tome & Principe?

2. Solar PV:As per the publication “Emission Reduction Profile: Sao Tome and Principe”, June 2013” prepared by RISO with the support of ACP-MEA & UNFCCC, there are, to date, “no official studies on the exact solar power potential: therefore, further calculations of the emissions reduction potential can be hazardous”.

Does Sao Tome & Principe have electricity?

The World Bank says Sao Tome and Principe has an electricity access rate of around 76%, with 92% of the total coming from imported diesel. The government has vowed to increase the proportion of renewable energy from 5% of the energy mix to 50% by 2030. This content is protected by copyright and may not be reused.

When will a 300 kW power plant be installed in Sao Tome?

Cleanwatts told pv magazine that it started developing 1.1 MW at Sao Tome airport and 300 kWp at Principe airport in August. It expects to complete the

arrays by the end of this year. Another 300 kWp will be installed next year at other communities in Sao Tome.
