Serbia Solar Energy System Project Quote

Overview

Serbia's upcoming second renewables auction, scheduled for later this month, aims to procure 124.8 MW of solar power with a ceiling price of €72 (\$75.30)/MWh. This price is lower than the €90/MWh ceiling offered in the country's first renewables auction last year. Can Serbia build a solar power plant?

The Government of Serbia has signed an agreement with the Hyundai Engineering-UGT Renewables consortium on building solar power plants with a total connection capacity of 1,000 MW (1,200 MW in nameplate capacity), along with battery systems for electricity storage of up to 200 MW/400 MWh. The signing will be followed by talks on financing terms.

What does a solar project mean for Serbia?

For Serbia, this project means more than just meeting renewable energy goals. It promises energy independence, economic stability, and a sustainable energy supply. By creating a network of self-balancing solar plants, Serbia strengthens its energy security, attracts green investments, and aligns with global environmental standards.

What is a 1 GW solar power project in Serbia?

1 GW Solar Power Project in Serbia, set to transform the country's renewable energy landscape and boost sustainability efforts.

Where will solar power be installed in Serbia?

The Ministry of Mining and Energy and EPS (Elektroprivreda Srbije) partnered with Hyundai Engineering and UGT Renewables to drive this project. Serbia will soon see six large solar plants strategically positioned across the country. Key locations include Negotin, Zaječar, and Bošnjace.

How many solar plants are there in Serbia?

Serbia will soon see six large solar plants strategically positioned across the

country. Key locations include Negotin, Zaječar, and Bošnjace. Together, these sites will provide 1 GW of solar energy capacity. Each plant will also have advanced battery storage systems totaling 200 MW, ensuring stable electricity flow across the national grid.

What is Serbia solar PV?

The electricity generated from the Serbia Solar PV will offset 1,900,000t of carbon dioxide emissions (CO₂) a year. UGT Renewables Serbia Solar PV will be a 1,000MW solar PV power project developed in a single phase. Articles, videos and more about our projects in Serbia.
