ContainerPower Energy Solutions

Sine wave inverter and charger

Overview

What is a pure sine wave inverter/charger?

Spartan Power pure sine wave Inverter/Chargers are a combination of an inverter and battery charger with an AC auto-transfer switch into one complete system (Introduction, 2-1. General Information). They have a peak conversion efficiency of 88%.

What is Spartan power pure sine wave inverter/Chargers?

Spartan Power pure sine wave Inverter/Chargers are a combination of an inverter and battery charger with an AC auto-transfer switch into one complete system (General Information). They have a peak conversion efficiency of 88% and are one of the most advanced inverter/chargers on the market today.

What is 6000 watt pure sine wave inverter charger?

Favorable price 6000 Watt pure sine wave inverter charger provides a reliable 110V, 120V, 220V, 230V or 240V AC power from 48V DC battery bank with high efficiency, also available with 240V input and 120V/240V split phase output.

Can I use a modified sine wave inverter?

Grid-tied systems require you to use pure sine wave inverters because the utility delivers pure sine waves. However, because you are operating an independent system, you are free to use a modified sine wave inverter. Keep in mind that some appliances and devices will not work with modified sine wave inverters, such as medical equipment.

What is a combined inverter and Charger?

Suitable for most household appliances. As a combined inverter and charger in one unit, a series of inverter / chargers on ATO.com deliver pure sine wave AC power from DC power and work as a charger for powering a backup battery

bank when a power outage occurs.

What is a 1000 watt continuous power inverter?

Efficient 1000 Watt continuous power inverter / charger generates pure sine wave power from 12V DC or 24V DC battery bank, peak power up to 3000W.
