

ContainerPower Energy Solutions

Sino-European AC Inverter

Overview

What is an AC-AC inverter?

An AC-AC inverter is a specialized component for an engine-generator that we developed. It features a driver for the electronic governor that controls the engine speed and does not require the customer to use an engine control ECU, thus helping downsize the footprint.

What is a sine wave inverter used for?

Sine wave inverters are used in generators to output the same electrical power as a household power outlet. They are used in various situations where electronic devices are used outdoors, such as in business scenarios like mobile sales and at construction sites, and in leisure scenarios like camping and barbeques.
