# Slovenia substation energy storage system

## Overview

---

A 10MW/50MWh battery energy storage system (BESS) spread across two substations in Slovenia has started a trial and testing period. The BESS projects are located at the Okroglo and Pektre substations and started their trial period this month, the company launching them announced.

A 10MW/50MWh battery energy storage system (BESS) spread across two substations in Slovenia has started a trial and testing period. The BESS projects are located at the Okroglo and Pektre substations and started their trial period this month, the company launching them announced.

Eastern European utilities integrate more renewable energy sources into their grids with reactive power compensation and other technologies. A view of Ban Jelačić Square in Zagreb, Croatia, which is the largest and most populous city in Croatia, as well as its capital since the country declared.

The SINCRO.GRID - Phase 1 project demonstrated how distribution and transmission system operators could enable their existing infrastructure to accept greater quantities of electricity from renewable sources while continuing to ensure a reliable electricity supply. Such integration has also.

A 10MW/50MWh battery energy storage system (BESS) spread across two substations in Slovenia has started a trial and testing period. The BESS projects are located at the Okroglo and Pektre substations and started their trial period this month, the company launching them announced. They are part of.

The Slovenia-headquartered company was recently in the news for a 20MWh project it commissioned in Austria, which is the country's largest, and it is deploying the largest battery storage systems in neighbouring Renewable energy infrastructure firm Field has announced the acquisition of Scottish.

Developer NGEN is deploying the largest battery energy storage systems (BESS) in Slovenia, Austria and Croatia, and wants to take its model beyond CEE too, CEO and co-founder Roman Bernard said. State-owned utility and power generator HSE is targeting 800MW of flexibility assets across Slovenia

by.

Slovenia's state-owned utility HSE is driving the country's energy transition with the deployment of 800MW of energy storage by 2035, including 590MW of pumped hydro energy storage (PHES) and 150MW of battery energy storage (BESS). This effort complements Slovenia's renewable energy expansion.
