

## ContainerPower Energy Solutions

# Solar 12v mobile power box

## Overview

---

How do you charge a portable solar power system?

Other people use them to power speakers while tailgating, or integrate them into van build projects. Most portable solar power systems — aka solar generators, power stations, portable power banks or battery boxes — can be charged via solar panels, a wall plug or a 12-volt car outlet.

Which batteries are compatible with the 12v-24v battery box?

Compatible with 12V-24V Batteries as long as they fit-in the box, such as Group 24, 27, 31 and most other AGM & Lithium Batteries. (Note: The battery box does not contain fixing frame inside and smaller batteries may not be suitable for this box.).

What is a kickass 12V battery box?

Our KickAss 12V battery boxes are heavy duty battery solutions that can still be mounted securely into your car, caravan, or trailer. You can simply remove your battery box from your vehicle if you don't need it taking up space, or if you want it to reach other appliances at your campsite.
